

The Future Of Full Spectrum Communications

A person in a dark suit and patterned tie is holding a tablet. Overlaid on the image is a network diagram with various icons (cloud, laptop, smartphone, server rack, etc.) connected by lines. The background is a soft-focus image of the person's torso and hands.

What Can The Cloud Do For You?

Anything Is Possible.

The Cloud revolutionizes business communications, allowing you to cut your costs and improve the efficiency of your employees while providing you with the reliability and security you need.

Connect Many Locations On One System

All of your facilities and remote employees share one account, one feature set, and one monthly bill, unifying your company.

Fully Integrate Your SmartPhone

Our mobile app turns your iPhone into a full-fledged extension and lets you make calls without using cellular minutes on 4G or wireless.

Keep Your Software Up To Date

We're always updating and improving our software, and we'll automatically upgrade you with the newest versions free of charge.

Work Remotely With Find Me/Follow Me

We can automatically route calls made to your desk phone to your mobile phone, home phone, and to your voicemail following your settings.

Project Your Presence Anywhere

We can provide numbers in any area code that will ring anywhere in the country while still displaying a local Caller ID to callers with no remote forwarding or long-distance charges.

Easily Use Advanced Unified Features

We empower you to use voice, fax, chat, video, conferencing, presence management, and more, all accessible from a single intuitive interface.

**What Makes
Our Solution
Unique?**

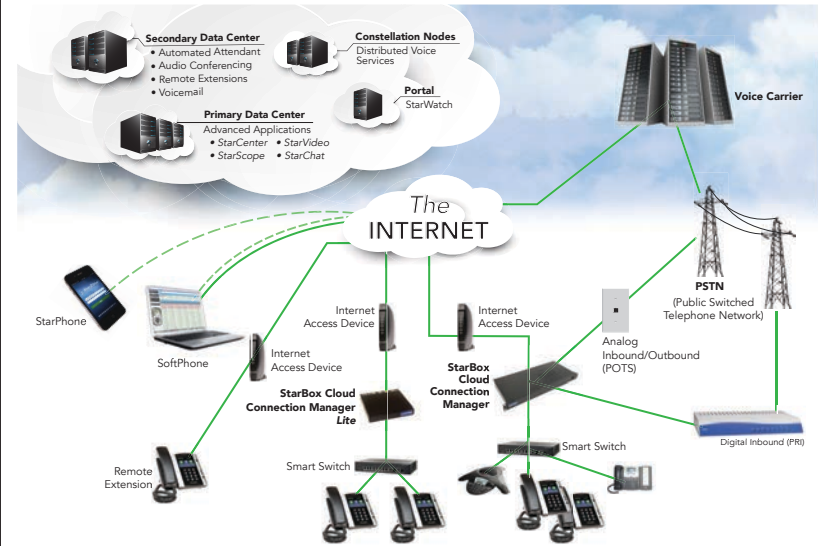

It's The Best Of Both Worlds.

We use a unique Hybrid Architecture and Constellation Network that combine elements of both on-premise and hosted systems, giving you all of the benefits of both without causing your business to suffer from the drawbacks of either.

Our Redundant Constellation Network

The Constellation Network consists of two primary data centers and eight additional major points of presence across North America and Europe, providing redundancy and extra security.

Our Exclusive Hybrid Architecture

Hybrid Architecture enables incredible cost savings and a rich suite of advanced unified communications (UC) features while providing unparalleled call quality and reliability.

**You Can
Always Rely
On Us.**

Minimize Downtime.

Our solution is ultra reliable. We take every precaution to protect you from downtime, even when disaster strikes. Our customers can rest assured that their bottom line will not be negatively impacted by a communications failure.

Our StarRecovery Solution

When your phones go down, your ability to conduct business goes down with them. StarRecovery, our comprehensive suite of disaster recovery and avoidance protections, protects you from financial loss and gives you a leg up on the competition when their customers can't reach them.

If your system is unreachable for any reason, we can automatically route your calls to remote locations or employee cell phones. Our cloud-based auto-attendants will continue to route calls and provide callers with information. You will be able to access your voicemails from email anywhere with sufficient bandwidth. You won't ever be out of reach even if your offices are inaccessible. For lesser mishaps, we include free next business day parts replacement on our equipment.

Our Reliability Guarantee

We guarantee 99.999% uptime reliability and have maintained 100% uptime since 2011. We take great care to keep your system running, including:

- Continuous monitoring of every system
- Alert notifications when something is amiss
- Analog line backup
- Redundant data centers and phone carriers
- Redundant Internet connections
- 24/7/365 proactive support from dedicated support staff

The background of the image is a collage of various US dollar bills, including \$100 and \$500 bills, with a semi-transparent blue overlay. The bills are scattered and overlapping, showing details like the Treasury seal and serial numbers.

Are You Looking To Cut Costs?

Save Up To 50% Every Month.

Our solution is designed to maximize your budgeting flexibility and cut your communications expenses. Let us analyze your current bill, and we will show you everything that we can do to minimize your overhead. You have nothing to lose and everything to gain. Give us a call today.

Don't Let Your Communications Bill Drag You Down

Nothing is more important to your business than your bottom line. Our solution includes many cost-cutting features that your accounting department will love. One of the most important of these features is line pooling. We allow you to share a single set of virtual call pathways between all of your locations. This reduces the total number of lines you require and must pay for. Some large distributed enterprises save tens of thousands every month just from line pooling.

We also save you money in many other ways. Our energy-efficient hardware cuts your power bill. Our free next business day parts replacement and support staff reduce maintenance costs. We offer low-cost models, leasing options, and rebates on hardware to keep your upfront costs low. Many of our products such as auto-attendants and voicemail replace more costly alternatives such as late-night call answering services.

One of the biggest advantages of our system from a budgetary standpoint is that you will receive a single, predictable bill from a single provider every month. You will know what your expenses are going to be months ahead of time, allowing you to more accurately forecast your future finances. Having a single bill saves you time and simplifies your life.

**Solutions For
Businesses Of
Every Size.**

Our System Is The Right Fit For You.

Whether you own or work in a small business, big company, or somewhere in the middle, we have a unified communications solution that can save you money, grow with your company, and give you more features than ever before!

Small Business

Whether your small business has 10 users or 100, Star2Star Communications delivers the world's most complete cloud-based unified communications solution for your business VoIP problems at a price you can afford.

Midsized Business

Ideal for midsized companies with up to 500 lines in one location (with devices including deskphone, softphone, and iPhone), Star2Star is customizable based on number of lines or seats.

Enterprise Solutions

Enterprise Edition is an ideal way to improve efficiency for businesses with more than 500 VoIP users in one location (three phones per user: deskphone, softphone, and iPhone) and is customizable based on number of lines or seats.
