

isolved Perform Small Business

Simple, Scalable Performance Management to Build High-Performing Teams

For small businesses, balancing day-to-day operations while building a high-performing workforce is no small feat. Without the right performance management tools, it's easy for feedback to become inconsistent, goals to get lost, and employee development to take a back seat to other business priorities.

isolved® Perform Small Business makes performance management simple, flexible, and scalable for growing operations. With a modern, mobile-responsive design, customizable templates, rating scales and dynamic tools, it helps businesses deliver meaningful feedback and build a high-performing workforce without added complexity.
